

6 Applicants shall provide the following minimum information, plus any other pertinent information, as may be required by the Flood Plain Administrator to make his / her determination:

- A completed application form
- A engineered plan of the entire site, clearly and legibly drawn at a scale of one (1) inch being equal to one hundred (100) feet or less, showing the following:
 - North arrow, scale and date
 - Topographic contour lines at a minimum of two (2) foot intervals
 - The location of all existing and proposed buildings, structures and other improvements, including the location of any existing or proposed subdivision or development.
 - The location of all existing streets, drives and other access ways;
 - The location of any existing bodies of water or watercourses, identified floodplain areas and, if available, information pertaining to the floodway and the flow of the water, including direction and velocities.
- Plans of all proposed buildings, structures and other improvements, drawn at a suitable scale, showing the following:
 - The proposed lowest floor elevation of any proposed building based upon North American Vertical Datum of 1998.
 - The elevation of the base flood;
 - The finished flood elevation of proposed new streets shall be no more than one foot below the regulatory flood elevation
- Topographic plans showing:
 - Existing contours
 - Proposed contours
 - 100-year flood elevation
- Where any excavation or grading is proposed, a plan meeting the requirements of the PA Department of Environmental Protection, to implement and maintain erosion and sedimentation controls.

7 I hereby certify that all of the above statements contained in this floodplain application and any papers or plans submitted with this floodplain application to the Upper Merion Township Flood Plain Administrator herewith are true and correct to the best of my knowledge and belief.
